| **7** HDMI Output | **8** HDMI Output | |
| **9** Audio Output | **10** Component Video Output | |
| **11** S-Video Output | | |

## INSTALLATION

1. Power off all connecting equipment prior to installation such as video player, display monitor.

2. Connect HDMI cable from "HDMI Input" to video source.

3. Connect converter to displays and audio speakers. There are three sets of outputs available. All outputs work simultaneously.

   ● HDMI Output and Audio Out: provides the same resolution as "HDMI Input"

   ● Component Video Output- video is scaled down to PAL or NTSC format depending on user setting (default setting is NTSC)

   ● S-Video Output- video is scaled down to PAL or NTSC format depending on user setting (default setting is NTSC)

4. Connect Converter to power source and turn on the power.

5. "HDMI Input Indicator" lids when input is successfully connected to converter. However, when input is from a DVI source through a connector, the Indicator is disabled.

6. Switch on all connecting devices, ie, display source, audio source (optional) and monitor.

7. Use "DIP Switch" and "SET" button to select desired format and scan mode.

| NO | A | Mode |
|----|---|------|
| 1  | 0 | PAL  |
| 2  | 1 | NTSC |

| NO | B | C | Mode |
|----|---|---|------------|
| 3  | 0 | 0 | Under Scan |
| 4  | 0 | 1 | Over Scan  |
| 5  | 1 | 0 | Pan Scan   |
